The Waste Sector to Deliver Climate and "One Health" Benefits

Organized by: BRS Conventions, FSWP, ISWA

List of speakers

Moderated by Corinne Trommsdorff, *Executive Director, French Solid Waste Partnership (FSWP)*

Introduction:
Ms. Barbara Pompili (TBC), *Ambassador of France to the Environment*

Panel discusion:
Mr. Jean-Patrick Masson, *President, Cercle National du Recyclage*
Ms. Aditi Ramola, *Technical Director, International Solid Waste Association (ISWA)*
Mr. Nicolas Chenet, *Director, Sustainable Development Department, Expertise France*
Ms. Clara Cherblanc, *Head of Advocacy and Public Affairs, La Fédération Mode Circulaire*

International frameworks' contribution:
Mr. Rolph Payet, *Executive Secretary of the Basel, Rotterdam and Stockholm (BRS) Conventions*

Conclusion:
Ms. Aditi Ramola, *Technical Director, ISWA*
Ms. Corinne Trommsdorff, *Executive Director, French Solid Waste Partnership*

Environmentally sound waste management is needed to manage legacy and existing waste, reduce their climate impact, and deliver one-health benefits. It requires governance systems, regulations, enforcement, and a fiscal system that enables to cover the costs.

20% of anthropogenic methane emissions come from the waste sector and can be reduced with fairly low investments and significant One Health co-benefits. The methane solution is twofold:

1/ Capture methane from legacy waste, which requires strengthening regulatory enforcement capacities, financing, and viable business models, as well as sound land management.

2/ Better manage the waste generated (prevent, collect, treat), which requires cross-sector dialogue involving agriculture, industry, energy, and water, as well as consumer awareness and appropriate regulations and economic models.
